

AMPCO'S BEVERAGE CART

(Beer Cart)

Ampco's Beverage Cart utilizes Ampco's AC series pump. It is built onto a lightweight, yet robust two-wheeled cart for easy transport. The cart is constructed of stainless steel tubing for corrosion resistance. It comes with a NEMA 4X VFD with many input and output electrical configuration options. The wheels are solid polypropylene. In addition to our AC series any one of Ampco's centrifugal, positive displacement, blenders, or twin screw pumps are eligible to be put on a two or four-wheeled cart at the factory. Ampco can source an array of different VFD's with many options to offer. Some other notable features:

- 1 Output wiring between VFD and motor is included
- 2 Customer-specified pigtail and plug can be provided for input power
- 3 Port height specification is possible – we will fulfill your piping needs
- 4 Cord hangers are provided
- 5 The carts are ergonomically designed for ease of use in tight spaces
